A truly versatile data analysis and data management software, called KEYMACRO, has been developed to make the process of data analysis much simpler. This software does more than collecting the data for analysis. KEYMACRO organizes the data from various sources and presents it in one of the two forms: a table, and a pie chart. Its analysis capabilities include calculating mean, standard deviation, variance, percentiles, correlation coefficient, skewness, etc. KEYMACRO also allows users to export the data to a variety of file types such as Microsoft Excel, JPG, or HTML. Key Macro can import/export data to any number of Windows based programs using an OLE style interface. Data can be exported to Word, Excel, or Power Point, Access, Outlook, Outlook, Access, Outlook, O merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. Key Macro also includes a variety of other features such as filtering, grouping, merging, and merging of two tables. variety of other features such as filtering, grouping, merging, and merging of two tables.
