
VIDEO PREVIEW As your video editing needs grow in size, the tools needed to transmit, store and play back your media become more complex. Before the download and installation of a video converter is initiated, it is advisable to preview the video for a more accurate result, especially when a video converter is used for the first time. You can view the video, frame by frame, on a preview window, or even on your TV screen through a screen capture. You can also adjust the volume and control the video quality. ImTOO Video Editor allows you to save your video play settings into a file.

CONVERT AND RENAME Not only can you convert your video to a wide variety of other formats, but you can also adjust the video file name and format. By selecting a format, a file name and location, you can convert your video into the most suitable format. If you convert a video in the size of 1.5GB, you can keep your original file untouched. You can also rename a video to a new file name, providing you with your own movie title.

VIDEO PREVIEW You can view your video on a preview window, in the same window or via a screen capture. You can adjust the volume and control the video quality. You can also save your video play settings into a file. Note: For video or audio conversion, the original file cannot be modified in any way.

5.0.0 + Set one of the four languages (English, French, German, Spanish) as the interface language. + Set the default bit rate, frame rate and resolution when you convert video. + Change the bit rate of a video when the file is opened. + Change the frame rate when the file is opened. + Change the output profile, resolution, width, height and aspect ratio when you convert video. + Automatically detect the resolution of the original video when you convert video. + Generate an output folder. + Mute an audio track when you split a video. + Exclude a track when you split a video. + Automatically adjust audio volume when you convert video. + Automatically fade-in or fade-out an audio track when you convert video. + Edit a cropped frame from a video. + Support to merge multiple MP4 files. + Support to merge multiple AVI files. + Support to split a MP4 file into multiple MP4 files. cc6f4944dd
