
A Keyboard Macro utility to insert or replace text (according to keyboard shortcuts) with snippets of text found in your clipboard. Use Macros to quickly insert something that you might want to keep around, like a company's phone number, or a favorite quote. And you can even define macros with custom keystrokes of your choosing. This app is compatible with several different clipboard managers and other useful utilities. KEYMACRO Features: ➤ Easy to set up and customize. ➤ Easy to add your own snippets, so you can insert many things at once. ➤ Undo is also easy to find, and you can create simple customized actions to do with a single keystroke. ➤ A tool-tip window appears when you are ready to create your macro to save time. ➤ Import snippets from a variety of other apps and use them for your own snippets. ➤ Auto-saves your snippets to help you never lose them. ➤ Easily add your own custom actions to be able to use the app for your own purposes. ➤ When you make changes, you can even set up macros to replace your old code. ➤ Share your snippets on social media and get credit for your work. Keymacro is available for: ➤ Windows ➤ Mac ➤ Linux ➤ iOS How to make macros: 1. Place the snippet in your clip board. 2. Click the macro icon in the top left of the app. 3. Click on the created button in the top left of the app. ➤ Add custom actions with the following methods: 1. Click on the little drop down arrow next to the keystroke. 2. Select one of the methods. KEYMACRO Requirements: ➤ The app itself requires Java 8 or above. ➤ You will need to have a Windows machine with a newer version of Windows to run the app. ➤ You will also need an installation of the latest version of Java to run Keymacro. ➤ To run the app on Linux or Mac, you need to have Java installed, but the requirements for running the app are the same as running it on Windows. ➤ This app is also compatible with several other apps and utilities. You can also use the app to make your own snippets. KEYMACRO Supported devices 70238732e0

KeyMacro gives you the ability to easily keep track of your hotkeys (or combinations of them), if you find yourself having to use them quite often. This is no longer an issue if you find yourself using KeyMacro regularly, because it helps you configure the hotkeys for all the software that you use on your computer. Features: * Manage all your hotkeys * Organize them into groups * Keep track of your favorite hotkeys * Configure any hotkey combination you like * Set the hotkey combination for each of the keyboard layouts you use * Configure your hotkey settings at any time, from any application * Quickly save and apply your custom hotkey configurations If you're tired of memorizing hotkeys, just use KeyMacro to organize, modify, and save your custom hotkeys and combinations in one go. This program makes it possible to not only easily keep track of the hotkeys you use, but also to modify them if you'd like to improve your workflow. With KeyMacro you can simply save, load, or edit any of your hotkey configurations at any time. And if you're looking for a better way to remember and set up your hotkeys, you can store and restore them to the configuration files with just one click. KeyMacro keeps track of your custom hotkeys for all your programs. You can easily organize them into groups, and associate them with a specific hotkey that you frequently use. If you'd like to improve your workflow, use this application to easily keep track of your hotkeys. Whenever you find yourself working in a program, you can simply press a combination of keys to instantly switch to your most frequently used hotkey configuration. KeyMacro allows you to keep track of your hotkeys, and it gives you the ability to quickly configure and modify your hotkey settings. Simply remember the hotkeys you use the most, and configure them with just one click. KEYMACRO is a

free program and can be used by anyone who wants to organize their hotkeys. KEYMACRO Technical Details: Version: 4.5.2 (Build: 2012-07-18 12:23) Platform: 64-bit OS: Windows 7 File Size: 548.53 Kb SPECIAL NOTE: This program is not guaranteed to work on all computers due to system incompatibility.
