LinnTech synth voices, voices plus effects, a synthesizer sequencer, and stereo inputs for MIDI. I compared the model CZ216 to two oscillators, the Roland E50 synth, and the SunDSP DDD2XL. The range of sounds on offer is wide-ranging, including harmonic, frequency modulation, and wavetable sounds. Notably the model CZ216 has an onboard compressor and a VC filter with two bands that allow you to shape the sound. The oscillator, and both the synthesizer sequencer and the synthesizer itself, use digital audio data, not MIDI. The CZ216 has MIDI outputs for exporting sounds into digital audio. These controls are exposed, so you can use them without having to use the control panel. The sequences and wavetables all use a wind-up tempo. You can set the tempo at the top of the panel, or use the puch-a-meter to select the tempo. The synthesizer has a built in
