Contact Us and We will remove it.Q: What alternative is there for rxjs's BehaviorSubject and mergeMap() I want to compose Observables sequentially: const input\$ = this.getInput(); const output\$ = this.getOutput(); Observable.combineLatest(

input\$, output\$, ...) .map(combine => this.mergeMap(combine =>

this.getFoo(combine.foo)),) .subscribe(); The above will not work because the

combineLatest() call combines the two observables together - when I call getFoo(combine.foo) from within the.map() call, it's called simultaneously. So I have

two questions: Does anyone know a way to compose this that will work given the above circumstances? What's a good alternative for the operator I'm trying to simulate here (since it's non-existent)? A: Using forkJoin may be the easiest way. Try using

forkJoin: forkJoin(observable\$1, observable\$2) .subscribe(result => console.log('Result', result), error => console.log('Error', error)); See also kristopolus

blog post on forkJoin. A: Use combineLatest with a forkJoin const input\$ = this.getInput(); const output\$ = this.getOutput(); Observable.combineLatest(input\$, output\$, ...
