
EasyTemplates is the most powerful Flash website creation program available, giving you the ability to design and create your own Flash website using one simple step-by-step editor. Create a Flash website using any number of Flash template files that can be easily edited and replaced with your own content and graphics. You can create and edit your site in 3 steps: 1. Start the Flash template editor to select a template or create a custom template. 2. Modify the text and graphics on the template with any combination of text editing tools and graphical layout tools. 3. Preview your work and test it on your webserver. Note: You can edit the text and graphics, save as a SWF file, upload to a webserver, and test it all in one simple step. Key Features: 1. Create Flash websites with any number of Flash template files that can be easily edited and replaced with your own content and graphics. 2. Easily edit the template text and graphics using standard text and graphical editing tools. 3. Create a Flash website in minutes by simply selecting a template or creating your own template. 4. Preview your work and test it on your webserver. 5. Save your Flash website as an SWF file to preserve it. 6. Remove watermark to make your site public. 7. Only sell the source files. 8. Integrate with popular websites to automatically generate a flash website in the background. 9. Use multiple themes to change the look and feel of your website without changing your code. 10. Enjoy other exciting features. Publishers: EasyTemplates Inc. With Easy templates, you will not need any other tools besides Notepad (which comes standard on every computer) to modify the content of your website template. That's right, you don't have to buy any HTML editor such as Dreamweaver or Frontpage, nor Macromedia Flash. All you need is just a Flash Template from Easy template. Creating your own entire Flash website is peanuts using Flash templates from EasyTemplates. EasyTemplates offers you the most flexible and easiest way imaginable to create Flash websites. You don't need to know Flash or HTML, just enter all your content in a standard text file, replacing the text and colors with your own, and upload the files to your webserver. It's that easy! Easy Templates Flash Website Kit currently contains seven 70238732e0
