Keymacro is a keyboard shortcut recording and restore application which stores and restores the currently pressed keyboard shortcuts (such as Ctrl+C or Ctrl+X). Keymacro can be used to store and restore the shortcuts even if you are using a different keyboard layout. With Keymacro you can easily create your own personal macro to save time and to avoid using the keyboard. Keymacro is a professional keyboard recording and restoring utility. The shortcut of your choice can be recorded and then restored to any keyboard by using the drop-down list. By using the keyboard shortcuts you can easily save your time and typing without using the mouse to select the option. The application stores the currently pressed keyboard shortcuts so that you can access them anytime from any application or from the command prompt. The application can be used for both Windows and Mac users. Keymacro is a free software and requires no registration or configuration. Features: * The application will create a keyboard shortcut that saves the currently pressed keyboard shortcuts. * The application will create a keyboard shortcut that will restore the previously pressed keyboard shortcuts. * You can choose the keyboard layout which should be saved/restored. * The shortcut can be saved and restored even when you are using a different keyboard layout. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the time interval of the recorded shortcut. * You can choose the time interval of the recorded shortcut. * You can choose the shortcut to be stored/restored. * You can choose the shortcut to be stored/restored. * You can choose the shortcut to be stored/restored. * You can choose the shortcut to be stored/restored. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose the target application of the shortcut. * You can choose 70238732e0
