Falls Church Police posted on Facebook that on Monday they closed the intersection of East Broad Street and East Hillside Street to both north and southbound traffic. The road closure, which started at 9 a.m., was to be in place until 7 p.m. or until “traffic flow improves.” West Broad Street is still open, and East Broad Street will be opened when the Police Department deems it safe. Previously, Falls Church Police announced they closed the road for one block on April 12 because of the proximity of the crash sites. On September 1, they closed both North and South Broad Street, stopping traffic for two days. 36.07114 -78.192746Q: Differential Equation of Integration For the equation $\frac{x^2}{2}+x^3+3x^2e^{-x}=0$, I know that the general solution is $x=\frac{1}{\sqrt{5}+\sqrt{5-5\sqrt{5}}}$ by using the method of undetermined coefficients. However, I wanted to find another method of integration in order to get the general solution. Here is what I did: $\frac{x^2}{2}+x^3+3x^2e^{-x}=0 \implies x^2-x^3-3xe^{-x}=0 \implies \left(x-\frac{1}{6}\right)\left(\frac{1}{6}-x\right)e^{-x}=0 \implies \frac{1}{6}-x=c \implies \frac{1}{3}\left(\frac{1}{6}-x\right)=c \implies \frac{1}{3}\left(\frac{1}{6}-x\right)=c$ d4474df7b8
