The game was released for the Sony PlayStation, Sega Dreamcast, and Microsoft Windows in the summer of 1999 and received critical acclaim. The game is most remembered for its soundtrack, and for its inclusion of a G.O.D. mode, in which players could select their preferred music in-game. While FIFA 2000 never received a sequel (the next game, FIFA 2001, was instead released two years after the game's release), it inspired the development of EA's Madden NFL 2001 and NFL 2K2. Gameplay FIFA 2000 features several new additions to the franchise, including the ability to carry one or two teammates on the pitch at once. It also features the ability to control four attacking players, as well as controlling the goalkeeper using a new pass-and-shoot system. Also, players can now control referees and pitch officials to help them make calls during matches, allowing the refs to award fouls and warn players. During the game, the player can talk to other players, give instructions, take photos, or even send a text message using the new MMS feature. In addition, this is the first game in the franchise to feature a "random" P.A. system. This will include music during the match. If the user chose a P.A. song during the game, it will automatically be played during the game, though the user will have control over the player's actions. It also added significantly more detailed crowds to make the stadiums more alive. This was most evident in the England vs. Germany match where the crowd was vocal and gave the game a more dramatic feel. The game also introduced a greater emphasis on the use of headers and volleying, with penalty kicks also being introduced, along with a way to control your head's position during a header. Also, more accurate dribbling, especially when leaving defenders, was added to the game. The KickOff World Cup is a mini-game that was added to FIFA 2000. The game featured game play that was similar to the World Cup, and some of the best players of the world were also represented. The game also featured some gameplay tweaks, like the ability to play in three formations during a match (I think it used to be only two formations) and defenders could be instructed to push players on the pitch and not just defend. The game mode can be played in tournament mode, league, knockout, and the FIFA 2000 World Cup mode. If a team defeats f3e1b3768c
