a powerful windows macro recorder designed for Windows 2000/XP/VISTA and stored in the registry. It can record your mouse/

keyboard actions while you are typing on a web site, saving the record in a text file. [DOWNLOAD] FrySoft VideoConverter Description: FrySoft VideoConverter is a powerful utility to convert various video and audio formats. [DOWNLOAD] FrySoft VideoConverter Description: FrySoft VideoConverter is a powerful utility to convert various video and audio formats. [DOWNLOAD] movieCollector Movie Directory Utility Description: MovieCollector Movie Directory Utility allows you to create a video collection. This application has a friendly user interface and allows you to search for movies by title and director, as well as scan and create playlists by title, actor, director, or genre. You can create a play list by copying the existing movie folder to the play list. You can also add to the movie list by dragging movie files into the list. Create custom lists and name your lists. The program can read and save all files under the list, while you can remove, add, rename or copy movie files, playlists and list names. You can sort movies by title, actor, director, year, genre, rating, or other criteria. The program can save any movie to your computer or connect to a video server to add your movies. If you have an existing movie collection on your hard drive you can create a new playlist from the movie folder. The program will display the details of the movie including actors, director, year, release date, genre, and rating. You can also preview movies on the fly. By default, a music file is played in the background while the video of the movie plays. You can select any movie as the video source for the movie while the sound track is left on the default settings. If you have an audio source set, the software will automatically adjust the playback volume for the audio or video track. You can record the sound track to a separate audio file. You can save the entire playlist, only the movie titles or only the movie files to a directory on your computer. You can copy a playlist to an online video server, such as YouTube, iTunes Music Store, or Yahoo Movies, so your collection will be accessible from other computers. The program's free version has limited features and saves movie information only to your local drive. The Pro version adds support for
