However I have two issues with the code I have so far: The first dataframe contains 50 rows, but my code only creates a.png file for a sample of 20 and the rest are left blank (I can see the data missing from the.png file). I cannot figure out how to get the data to move to the next.png file. I want to create a dataframe with 50 rows. Then for each row, I want to select a random sample from the data. I have done this by creating a list of sample data in the "B" column. Then I want to write the.png file to the location I specified. I have also created 50 of these lists, each named with a number from 1 to 50. The dataframe looks as follows: Below is my code so far: for i in range(len(data.iloc[:, 1])): # create a random sample newdata = data.iloc[:, 1].iloc[i,] new_list = random.sample(newdata, sample_size=1) file = open(r"C:\Users\RSS\Desktop\Test\Seeder.png", "wb") # write dataframe to png for j in range(len(data.iloc[:, 1])): df = pd.DataFrame(data.iloc[j, :]).set_index('Date')

This page's article on The Verge includes a direct download for driver 388.71 WHQL. It's linked from the driver's product information page. Dec 23, 2017 Download the English (US) GeForce Game Ready Driver for Windows 7 64-bit, . The latest GeForce Game Ready driver, release 388.71 WHQL, . Jan 14, 2018 Download the English (US) GeForce Game Ready Driver for Windows 7 64-bit, Windows 8.1 64-bit, Windows 8 64-bit systems . Released 2018.01.14. Version: 388.96 WHQL. Release Date: 2018.01.14. Operating System: Windows 7 64-bit, Windows Vista 64-bit, Windows XP 64-bit. Language: English (U.S.). File Size: 128 MB . Version: 388.71 WHQL. Release Date: 2017.10.29.
