A: .rar is a rar file format - not an image format. You need to download the.rar file using a.rar file downloader. For Windows 7 and Windows 8 see this link. Q: Invalid Argument OutOfRangeException when opening file I am trying to open files with the same filename in a folder with the following code

```
public partial class Form1 : Form { public Form1() { InitializeComponent(); } private void button1_Click(object sender, EventArgs e) { OpenFileDialog ofd = new OpenFileDialog(); ofd.Title = "Open File"; ofd.Filter = "All files|*.txt"; ofd.FilterIndex = 2; ofd.RestoreDirectory = true; if (ofd.ShowDialog() == DialogResult.OK) { textBox1.Text = ofd.FileName; } else { MessageBox.Show("Error", "Error", MessageBoxButtons.OK, MessageBoxIcon.Error); } } private void button2_Click(object sender, EventArgs e) { StreamReader sr = new StreamReader(textBox1.Text); string fileName = textBox1.Text; sr.ReadLine(); sr.Close(); textBox2.Text = fileName; } My file is saved with the name "test.txt", but I get the following error An unhandled exception of type 'System.ArgumentOutOfRangeException 2d92ce491b
```
