Latest News A lot of people don't know the best way to download their videos or photos off of their digital cameras. It is possible to either download videos to your hard drive and view them through your computer, or connect your camera directly to your computer and download the videos. However, there is a better way than these to get your videos and photos off of your camera. That method is to connect the USB cable from your camera to your computer, start up Adobe Photoshop Elements, and then go to the file browser. When you have connected your camera to your computer, a dialog box should come up on your computer. Click the File menu and choose Download Photo Files. Adobe - Photoshop CS5 Once your file browser has opened, you will be able to see all the files on your camera. If you see a folder, it means you are looking at your pictures or videos. Once you select the photo or video you want to download, then click Open. If you want to only download a specific photo or video, hold down the Ctrl button on your keyboard and select the photo or video you want to download. Adobe - Photoshop CS3 Once your photos or videos are on your hard drive, you can open Adobe Photoshop Elements and choose File>Open. If you want to save your photos and videos as MP3 files, or burn the photos and videos to DVD discs, then you need to use Adobe's DVD Creator or DVD Labeler software. Photoshop Elements offers many other tools that are very useful for photo editing. The best part of Photoshop Elements is that you don't have to be a Photoshop expert to use the software. A very quick Internet search will show you the many tutorials that are available on the Internet. Most videos on the Internet are saved in.MP4 format, and if you don't have a camera that can shoot in.MP4 format, 2d92ce491b
