
As a standard MIDI controller, the KEYMACRO II is designed for live performances. Its buttons and sliders are quite large and easy to use. It's also suitable for composing in the studio with its MIDI capabilities. Minimum Requirements: Operating Systems: Windows XP, Vista, or Windows 7; Mac OS X 10.5 Dimensions (mm): Length: 340mm Width: 330mm Weight (kg): 2.5kg IsoPad is designed to play any digital instrument, whether synthesizer, sampler, sequencer or even drum machine, offering three different, key-shaped touch-enabled keyboard layouts. Using the classic piano fingerboard, the software provides a pure digital piano experience. The four-octave instrument offers sliders, faders and other special controls to further enhance the instrument's features. The 10 key-shaped isomorphic layouts are suitable for touch-enabled devices, and their 5 octaves, 3 semitones per octave (31 semitones) and 1 semitone per octave (12 semitones) fingerboard are optimized for touch screen. IsoPad provides the most advanced isomorphic keyboard layouts available. The piano layout is accompanied by its more common isomorphic keyboard layouts, where the most played chords are closer to the keys. In addition, IsoPad allows you to play your instrument on touch screens using different keyboard layouts. It offers three different keyboard layouts, allowing you to choose the one you prefer. The 'Iso 1-5' displays one semitone horizontally and five semitones vertically, while 'Iso 2-5' adds one semitone horizontally. Last but not least, the 'Keyboard' layout comprises one semitone horizontally and twelve semitones vertically. As you can surely notice, the classic piano fingerboard is accompanied by the so-called "isomorphic keyboard layouts", which are perfect for touch-enabled monitors. Finally, IsoPad enables you to use the computer as a MIDI touch controller and to play any electronic MIDI instrument using touch. If you need a MIDI controller for live and studio performances, IsoPad is designed to be your best choice. Thanks to its user-friendly interface and its isomorphic layouts, this controller is as efficient as it is easy to use. It offers a great advantage over the previous version, IsoPad. If you have any issues with IsoPad, contact us by clicking on our Help Menu. Support : XOTO 70238732e0

KeyMacro is a freeware text to speech app for Windows. KeyMacro supports common text formats including plain text, csv, doc, dot, tex, mp3, mid, wma and ogg. KeyMacro is also able to synthesize speech from Windows system sounds. The system sounds include Windows 95 beep sounds, Windows 98 beep sounds, Windows ME and Windows NT beep sounds. KeyMacro supports text to speech conversion on the fly, while you type. This lets you convert text to speech in an instant. Features: • Synthesize Speech from Windows System Sounds. • The Basic Speech synthesis features available to KeyMacro are listed below: • Spelling Correction – Auto correct words as you type • Voice Detection – Reads the words as you type and changes the voice • Voice modulation – Linguistic and character-based voice modulation • Voice timbre – Speech can be recorded with different voice timbres • Time-dependent pitch shift – Pitch shifts as time progresses • Voice volume – Set the voice to speak at different volumes • Voice output type – Alternate between mono and stereo output • Text-to-speech-rate – Specify a constant or variable rate for speech. • Language – Enforce a given language in the text to speech conversion. • Start-up beep sound – Choose to use the Windows beep sound • Beep delay – Set the beep delay in milliseconds • Pre-emphasis – Enable or disable pre-emphasis processing. • Dictionary – Allow KeyMacro to use a custom dictionary, rather than using Microsoft's default dictionary. • Silent Mode – Enables or disables KeyMacro's own 'silent' mode. • Editing Mode – Allows you to edit text before conversion. • On the fly – During text entry, KeyMacro automatically converts the text as you type. KeyMacro also allows you to specify the texts to be converted. The Text Files can be in any common text format such as dot, plain text, csv, doc, docx, rtf, tex, html, txt, txt, html, csv, fld, or any other common text formats. KeyMacro supports text to speech conversion on the

fly. You can set KeyMacro to read the text out loud while you type in the text box. You can also define your own voices and modify
