Episode 2.Q: How can I remove a section of file path from a string using sed or awk? I have a file path with wildcards like this: /foo/bar/baz/bar/foo/bin/foobar/ I would like to remove anything inside /baz and replace it with empty string. I have tried this but it seems to fail because of invalid shell globbing: \$ sed -e's/\bazV.*//' sed: -e expression #1, char 13: unknown option to `s' \$ sed -e's/\bazV^*V/g' sed: -e expression #1, char 10: unknown option to `s' How can I get around this, preferably with sed and/or awk? A: With awk you may do: awk -v OFS='/' '/baz/ { sub(/baz.*/, "", \$2) } 1' file A: Using sed: sed -r's@/baz/([^\]*)@/@" or using sed: sed -i.bak '/baz/d' file If you are sure that the string does not contain wildcards: sed -i.bak's!baz!!' file Example File with strings from OP: \$ cat file /foo/bar/baz/bar/foo/bin/foobar/ /foo/bar/baz/foo/bin/foobar/ /foo/bar/foo/bin/foobar/ Using sed: \$ sed's@/baz/([^\]*)@/@" file /bar/foo/bin/foobar/ /foo/bin/foobar/ /foo/bin/foobar/ Using sed: \$ sed -r's!baz!!' file /bar/foo/bin/foobar/ /foo/bin/foobar/ 2d92ce491b
