Feb 6, 2020 DataNumen Microsoft Office Repair is a powerful Microsoft Office recovery suite. It includes recovery tools for corrupt MS Access databases, . References Category:Utilities for Windows Category:Data recovery softwareQ: Bulk importing of HTML into content using Advanced Custom Fields We want to import hundreds of pages into a new site. So far we have searched around and found the following The last of these is built into Word Press (which is great) but the first two do not work on a live site (which is also great). The problem is that only one of those can import 100 pages at a time and need to be run every night. Is there a better way than to get a list of ID's and call them individually on the import form? A: You've run across the issue of "if you have 1000 pages, there's no way to import them all at once." Most import plugins only allow you to import 1000 pages at a time. The "Import Your EWP's Into Wordpress" and "Bulk import of WordPress Elements with CSV 3ef4e8ef8d
