I'm using the [source] plugin with vim and I'm trying to use a visual-mode mapping to select a word and then shift-right arrow to paste the text. I'm trying to bind to. to do this in vim but as soon as I start writing characters in insert-mode I can't get visual-mode back. A: A quick google search showed this rather old blog, in which it mentions a command called T: (that is, Text-Object-Motion). By default, T is bound to Meta-Ctrl-y (at least in Vim 7.4). You can change that by adding the following line to your.vimrc T The blog entry also mentions other useful visual mode commands, including yank and yank-[count]. In general, one should not go into visual mode when using Vim, as Vim offers its own completely different workflow. If you want to use visual-mode for select-and-copy-paste, use some other tool (cycling through buffers, GUI or external tools) Q: How to calculate the sorting number of an array by python I want to calculate the sorting number of an array by python. Now I want to change it, use sys.getsizeof() as a parameter of the function. I can only get the length of an array without considering its content by using len(arr) while I need the length of the content. A: You can use a dict to find the number of comparisons. If you sort the numbers of values instead of just the length, you can find the number of comparisons by finding the number of items in the dictionary. from collections import Ordered

For example, users may exchange text-based messages or voice messages using IM applications. Instant messaging applications may deliver messages with rich content, including graphic and/or audio. Instant messaging is a communication tool that is commonly used in today's technology-driven mobile devices. Instant messaging may help people stay in touch and communicate with friends in a fast, easy, and private way. Instant messaging may facilitate communication within a group of users, which enables people to communicate in real time. Instant messaging applications may provide access to multiple types of users with different types of devices. Like reference numerals are used in the drawings to denote like elements and features.news, latest-news An elite Australian rules football player has revealed he was brutally assaulted last night, and now faces life-changing injuries. The Gold Coast's Drager Roos, from North Stradbroke, Queensland, was allegedly attacked by a group of 10 people late last night in a Surfers Paradise nightclub. Clubbers said he was knocked unconscious and unable to walk properly on the way out of the club, but was helped home by friends. "He is at the Gold Coast University Hospital now with huge lacerations on his face and head," a friend of Drager told The Courier Mail. "My mate was driving him home and he was bleeding everywhere. "My mate couldn't believe it when he realised he was bleeding from his head and he was knocked out. It was just a massive ambush, I don't know why they thought he would be in that little car. "They [who attacked him] must have pushed him into the street. He was literally knocked out, he didn't know how he got home, he didn't know how he got there." Dr f30f4ceada
