LuJoSoft Checksum is a simple and straightforward application designed to help you calculate hash values using the MD5, SHA-1, SHA-256 and SHA-512 algorithms. The program supports drag and drop actions, features a simple, but somewhat outdated interface, and is fully portable. LuJoSoft Checksum Features: -Hash values are generated using the MD5, SHA-1, SHA-256 and SHA-512 algorithms -The application is very lightweight,

and it has the advantage of not needing to be installed on your computer before it is launched -You can run it from any location, even portable storage devices -By default, the application calculates hash values using all the supported algorithms, but you can disable the ones you have no need for -You can select and copy them to the clipboard manually, but you can also complete this action by pressing the Copy buttons -The main window cannot be resized -Minimalistic and rather outdated

interface -All in all, LuJoSoft Checksum is a handy tool for users who frequently need to generate file hash values. It is very easy to use, supports drag and drop actions and is fully portable.
