Plugins developed by third parties Many programs use plugins to extend the capabilities of AutoCAD Serial Key. AutoCAD Activation Code plugin software, which is created in the Delphi or C++ language, is also available for many other commercial CAD programs such as PowerArchitecture, ArchiCAD, AutoCAD Full Crack LT, Adobe Freehand, and Tekla Architect. History AutoCAD was originally created by a team at Hewlett-Packard in Palo Alto, California. It was initially called the "HP Drawings Program". When Computer Associates bought HP in 1994, AutoCAD was rebranded Autodesk as part of a cost-cutting measure. The Autodesk logo was created by drawing a circle containing the words "Autodesk" inside and "Maya" outside, which was placed within the circle and filled with blue, green, and red paint. Originally, AutoCAD also supported only Hewlett-Packard plotters. In October 2000, former chief executive officer Jack Bensing er, along with Autodesk president and co-founder John Kasunich, left Autodesk to start their own company, ObjectARX, Inc., which is now a subsidiary of Autodesk, Inc. Bensing er created an Autodesk plugin system called "ObjectARX", and it is used in AutoCAD since the release of AutoCAD 2008. Editions AutoCAD releases are usually numbered in the X.Y.Z format, which indicates the year (X), quarter (Y) and month (Z) of release.
