Bullet Proof Mailer is an easy to use and powerful bulk mail sender. This mailer is packed with highly efficient mailing capabilities that will help you to save time sending mails to your customers. Here are some key features of "Bullet Proof Mailer":

- Highly Efficient Mailing Engine Bullet Proof Mailer has a robust multi-threading mailing engine that is designed to handle hundreds of mailing connections.
- Built-in powerful message editor Bullet Proof Mailer fully functional message editor. It supports both text and HTML formats as well as customize HTML message formats.
- Fast Delivery BMP uses your SMTP server. This is faster than other mailers that use internal mailer.
- Compatible Email format All of your messages will be saved as EML files which can be read by all email clients such as Outlook/Outlook Express, Eudora and others. You have the option to save your messages as a text file.

Limitations:

- Time limit Community Forum: Last edited by Hemanth on Fri Mar 19, 2009 2:07 pm; edited 10 times in total

So i heard about a new spam filtering software (mailing appareli) and have been doing some research before installing it. This new version was made by the same developer that made MailMarauder, MailSaver and Greylisting Cloud.

Main features:

- Supports mails and attachments(images,documents,ppt,xls,...)
- Sends from multiple email addresses
- Supports multiple spam engines
- Automatic and manual antivirus scanning
- Supports webinar invites and conference registrations
- Google Calendar integration (requires webapp)
- Webmail and mobile clients included

Limitations:

- P2B2-Yahoo/MailMarauder only
- Free service only for 30 days

Why i choose this one:

- Uses a hybrid SMTP system where their servers are used to receive the mail, hence the mail can be whitelisted easily without having to modify settings on all mail servers
- Uses a commercial database that does proper work for replies, for new mails and for attachments, so attachments get whitelisted as well

Send and receive email safely from a simple and secure web-based client. Bullet Proof Mailer will help you send and receive email safely to as many email recipients as you wish. Bullet Proof Mailer is a convenient way to email safely and secure and there are no monthly or yearly fees.

Key Features:

- Simple, Quick & Secure An easy and fast web-based SMTP email client for security, convenience, and safety.
- User-friendly & Secure Have instant access to any email account without having to worry about password.
- Use Your Own Email Yes, the web based SMTP Email client works with your own web-based email account. You can use it to send and receive emails as you wish.
- Autosend messages Bullet Proof Mailer is ideal for sending marketing and promotional messages to your customers.

Requirements:

- Windows or Android Bullet Proof Mailer is compatible with all major operating systems such as Windows, Mac, Linux, Android, and iOS.
- Web based SMTP email account If you want to use Bullet Proof Mailer, then you must have an SMTP Email account. You can also use your own SMTP email account.
- Email account and Email server You must have an Email account with SMTP email server.
- Internet connection You will need to have an internet connection to send and receive emails via a web-based Email client.
- Basic knowledge of Email addresses You will need basic knowledge of Email addresses to use Bullet Proof Mailer. You can also use user's own Email address.

Bullet Proof Mailer vs Other Mailers: Bullet Proof Mailer – You simply enter an Email address or your own Email address to send and receive emails instantly with this tool. Other Mailer – Other mailers use Email addresses from outside of email provider. They also upload messages to email server using their own dedicated Email server. So, this tool has access to both your Email address and your Email server.

Winmail Mailing Description: Easy to use, powerful and highly customizable Email marketing solution. It's a web-based email client that's fully integrated with their own email processing technology and you can use it to send and receive emails as you wish. It allows you to manage an unlimited number of subscribers, sends emails for you with messages, subscribes you to various lists, customizable, fully 09e8f5149f
