0 >>> Its name comes from "Vocaloid"; however, Vocaloid is designed for singing, and Voiceroid.ru, based on its capabilities, is engaged in writing music (using synthesizers) and publishing albums. In May 2014, the website Voicercore.com published information about the bankruptcy of the company. Revenue for 2014 was \$1.5 million. At the end of June 2020, the company filed for bankruptcy. The main profile of Voiceroid is the music project Voicert, but also the site Voocorder.com, on the basis of which Animation projects and video games were

also produced. Even before the opening of Voicervo, the creators constantly had problems with legal entities and other bodies. Vokeroid spread all over the world, and its developers soon earned a tidy sum on the localization of Voicersoft. Representatives of the Chinese company SooamJiah Composite (known in the fashion world as "Z" and "Baby Boy") promoted VoicÃ©tion as a kind of clothing - fortunately, people around the world appreciated their courage. Also in Russia, the Swedes paid attention to it, but no competitors appeared in Runet. By 2012, Voxeroid 3D was out on PC and met with an overwhelming success: over 11 million copies. Remote Control is a virtual reality drone control simulator using a keyboard and touchpad. The idea for the game originally belonged to Vocaloids, not their creators. The events of the game (shootout between two guards) take place in the "Treasury", which was under the influence of an attack by alien forces. An RV3 drone, controlled by an operator, attacks his opponent, who tries to stop the RV drone during a rollover, but gets under his protection and loses control. If the player doesn't give up

within thirty seconds, the OD2-CT01 RV turns into an Overdrive, which has tremendous destructive power and despite having only a fraction of the RV's power, it can be destroyed with a special knife hidden in the control. This game was originally published by Sony Computer Entertainment in 1987 and is the second in the Silent series
