Video Converter is a software which enables you to convert almost any type of video file to MP4, MOV, AVI, MPEG, WMV, MPG, VOB, DivX, XVID, 3GP, FLV, TS, 3GPP, VSR, MP3 and other formats, as well as to adjust the resolution, frame rate, bit rate, codec, audio channels, output video file size, and other parameters. You can also use it for encoding audio files, photos and any other types of file to one of the supported formats. Moreover, the program can burn DVDs, CDs, Blu-ray Discs, VCDs, SVCDs and other optical discs from virtually any type of video. The converter supports a batch file, and you can load the list of video files into the queue via the file browser or "drag and drop" method. The software has an intuitive interface, although we would have liked a few more settings. Although the program has no errors during its operation, it still requires much system resources. Also, you can pause and resume the encoding process at any time. We would have liked better compatibility with Windows 8, a clear snapshot, a higher rate of encodes, a faster start and a big list of output formats. Nevertheless, the program fulfilled all the required functions, so it can be recommended. Video Converter has been tested with Windows Vista, 7, 8.1, and 10. You can also use it with Linux and Mac OSX. You can get it here: The following features are available: Decoding video files: - loads of file formats: MPEG-4, Divx, xmms, XviD, DV, WMV, AVI, Asf, MPG, DVV, VOB, M2TS, TS, TS, 3GPP, FLV, MKV, MOV, MKA, VIVO, MXF, SRT, Real, RM, RMVB, TMT, ASF; - automatic reading of file names; - auto-detection of file extension; - batch mode: load the list of files into the queue and start the conversion; - ID3 information support; - various settings: input and output, audio, video; - quality presets; - trimming: batch modification of file duration and start point; - encoding
