Discord server: @vipdiscord Avatar: I have a 3.0tfsi 333hp '05 I got from a friend who had an older generation one that I was given. This is a brand new car without any modifications. I was not given too many specifications other than it is 333hp. He said that he got it from someone who got it from a friend of his. He said there were no modifications on it. I bought it off him for \$700 and it was all stock. I tried to take it to a professional to get tuned and they said they could not even tune it because the computer was bad. I have it running right at 20s and right at 60s. I can adjust the boost by adjusting the TPMS, it is set to Off. I am looking for a tuning file that will give me 20 or 30 hp more. I believe 20 or 30 hp more is good. I also want it to run for a long time, like 20-30 hrs. any help is greatly appreciated.
