It is a great utility that is useful for personal tasks management. It can create and modify various types of events in your calendar, and create or export Outlook Calendar to standard.ics,.mml,.m4b,.txt,.csv and more formats. In addition, you can also manage contacts, appointments, to-do lists, notes, and password. In short, it will allow you to create an address book with other people's personal and business information, schedule an upcoming event and take notes, as well as explore emails and send new messages, provided that you have linked the tool to a Microsoft Office account. A calendar with all events is put at your disposal, and you can easily tell them apart by color, depending on their category (e.g. important, business, birthday). You can also conduct search operations across the entire database, manage attachments, password-protect the database to restrict the access of other users, as well as import, export and synchronize data to a wide range of supported formats. We have been using EssentialPIM Pro for years and found it to be a very useful application for our daily work. We love that you can move a contact from one person to another. I love that you can show / hide and rename / delete items. I like that you can edit the subject line. We don't like that there's no link to where you can buy this. I also wish that we could see when
