Q: AS3/Flash Player 11 not displaying local html I just upgraded the flash player, and it does not look like it is rendering the HTML on the local server. I have a swf embedded on a webserver and it loads perfectly, but when I load it locally the HTML of the page is not loaded. I had this problem on previous versions of flash player but they fixed it eventually. I am running Windows 7 in case that makes a difference. I tried refreshing but that was useless. I'm at a loss as to why this would happen, I would have assumed that if the files were loaded in the first place, they would be displayed in their native format. Any help will be greatly appreciated.
