With the help of the Alcor Hibernate Utility you can create a special folder on your flash drive that will suspend or hibernate your flash drive on the Windows computer you are using it from. If you right click on the flash drive and select the Hibernate folder option, you can choose one of two options, Suspend and Hibernate. A person uses the Suspend option by choosing to suspend the computer or a specific program he or she is currently running. Hibernate will allow the person to easily and quickly suspend or restart the computer. The Hibernate folder option will not save the state of the flash drive, it will simply put the flash drive to sleep. Software HP USB Disk Storage Format Tool does
