Autophagy is an essential self-degradative process for the turnover of intracellular proteins and organelles. Recent evidence indicates that impaired autophagy is associated with the development of neurodegenerative diseases. Chaperone-mediated autophagy (CMA) selectively delivers cytosolic proteins to lysosomes for degradation. Recently, there is growing evidence that CMA plays an important role in Alzheimer's disease (AD) pathology. Here, we review recent evidence on the role of CMA in AD pathology, including increased aggregation of amyloid- β , tau, and α -synuclein; accumulation of senile plaques; and impairment of synaptic function, memory, and behavior. Furthermore, we review recent studies on the therapeutic effects of CMA in AD models. Work It Out (New Edition song) "Work It Out" is a song by American pop rock group New Edition. It is the first single from their 1999 album, One Love and the second single from their 2003 album, Love At First Sight. The song was written by group members Ricky Bell, Michael Bivins, Ronnie DeVoe, and Kirk Franklin.
