This post is a summary of the main features.

One of the main shortcoming of the Kofax K-8 is its price, which can vary from \$8,000 to \$20,000 per seat. Then, also considering that the software requires a SQL database to run, making it not very scalable. Klite is an open source, and free K-8 alternative that is designed to help people overcome the limitations of K-8, making it very scalable. Since its launch in December 2017, the project's community has steadily grown and, since then, it has been actively developing MyKlite. MyKlite is an open source document management software that should enable any organization to deploy the same closed source K-8 functionality without the need of a SQL database. MyKlite requires a Linux server, a NAS device, and a docker image. All three are available on the MyKlite website and can be downloaded within minutes. MyKlite has been constantly improving since its inception and has achieved a steady state in recent years. It is currently used to manage over 5000 user accounts in 50 companies and over 300GB of documents. MyKlite stands out for its open source nature, its versatility and scalability, and its ability to be deployed without a SQL database. But if the SQL database is required for support reasons

Mandriva 2019.2 is an easy-to-use Linux distribution, offering the best out-of-the-box experience. It supports a number of desktop environments (GNOME, KDE, Xfce, Cinnamon and MATE), which allow you to tailor your desktop environment to your needs. This new release contains the updated GNOME 3.34 desktop environment, which is polished and faster than ever, as well as the latest OpenOffice.org, Thunderbird and Firefox web browsers. You can install new applications using the pre-configured Mandriva Software Center, or the GUIMini installer, or install your applications from the official repositories, thanks to a collection of useful utilities. During installation, the system will guide you through the process of choosing the desktop environment to use, the installation location, as well as allow you to encrypt your home directory and re-install the operating system. GNOME desktop environment GNOME 3.34, the latest release of the GNOME desktop environment, brings a new option for locking the screen when not required. This option is offered in the GNOME Settings. The keyboard shortcuts for switching between desktops have also been improved to make switching between the desktops faster. GNOME 3.34 also ships with the latest version of GNOME Music, the software that offers a simple way to organize and listen to your music. GNOME 3.34 also ships with the "Search" software, which allows you to search for files and folders in a way that is similar to a Spotlight search on MacOS. GNOME 3.34 also includes GNOME Maps, a well-integrated mapping program that aims to make finding things with Maps easier and faster. You can now customize the toolbars and add new applications to them through a new GNOME Tweaks tool. For instance, you can now add QuickLists in the GNOME Tweaks, which are lists of commonly used shortcuts and add a Firefox reader to the GNOME Tweaks toolbar. The three keynotes at the beginning of the event were given by Camillo Sabat
