Category:Swiss computer scientists Category:1927 births Category:2015 deaths Category:ETH Zurich alumniSunday, September 28, 2012 My wife and I have passed our second anniversary with our little family. We are two parents with our two sons who are 10 and 7 years old. No tv, internet and a few books for some entertainment at night. What's left is scheduled fun, and most of all we have each other and a very good life. We are very happy together. And we have lived to tell the tale. We have had our bad times as well as good. But together we have done very well. 2 comments: I second that motion (or would like to, but I won't get voted down anyway). You're very encouraging, and I'm glad to hear things are going really well for you. We may not live on a farm, but we live our lives like we're on one - getting up early, working on the farm, being in the garden and the woods, and going for walks in the early mornings with our two pups, who get in the way of a lot of things. We can't have all the comforts of a modern lifestyle, but the simple things we have are all we need. Being with each other helps us not to go crazy sometimes. I've had days when there wasn't much to do but sit and watch television or go to bed, and it gets old real fast. My wife and I can only do "normal stuff" with each other, so we're very happy to be with each other and not alone.Znamenita Znamenita () is a small settlement in the Municipality of Šentjur in eastern Slovenia. It lies just south of the village of Popovci. Traditionally, it was part of the Styria region. The area is part of the historical Styria region. The municipality is now included in the Savinja Statistical Region. References External links Znamenita at Geopedia Category:Populated places in the Municipality of ŠentjurIntracellular recording and histochemical localization of the acetylcholine receptor in a neuron of the chick ciliary ganglion. The acetylcholine receptor was studied with intracellular recording and microelectrodes in the ciliary ganglion of chick embryos. The maximal amplitude of the inward rectification was found 82138339de
