Online Chapter(s): Chapter 35—Computer Graphics/Chapter 36—Coordinate and Ray Representations. Year: 13 Pages: 11 Area:Introduction Chapter 35—Computer Graphics/Chapter 36—Coordinate and Ray Representations. Year: 13 Pages: 11 Area:Introduction Category:1965 births Category:Living people Category:Engineering educators Category:Indian academics Category:Indian academics Category:Indian software engineers Category:Scientists from Bangalore Category:Karnatak University faculty Category:Manipal University alumni Category:Sree Chitra Tirunal Institute of Medical Sciences alumni Category:University of Texas at Austin alumniProgram Certified Foundations Level 1 Description This course covers the basics of how food is grown and processed, from its nature, nutrients, composition and safety. The course focuses on choosing and preparing healthy meals, common food substitutions, available natural health resources, natural and safe personal hygiene, and how to avoid food-borne illnesses. The certified foundations course levels covers the general concepts of how to live an organic lifestyle and the knowledge and skills of making and processing safe meals from raw foods. Through practice in how to select, prepare and serve healthy food and the use of nutritional and natural health resources, you will learn to make healthy food choices and develop healthy lifestyle habits to promote greater health and wellness. This course does not provide specific instructions on how to grow and cook organic food. For this information, take the Certified Organic Food Grower & Cook course. Prerequisite Admission Students must be able to read and write in English or Spanish. Students must enroll in the Foundations Level 1 course at least six weeks prior to the date of the first class. The information on the first day of the course will be posted on this site approximately six weeks prior to the first class. Meal Planning Pre-planning your meals will help to make your cooking easier and more enjoyable. Plan out your meals one to two weeks in advance and try and stick to it. Use prepared meals such as boxed or canned foods, frozen foods or frozen entrees. Make a shopping list, check it twice before heading to the store. Do not skimp on food quality. Use the refrigerator and freezer well. Use food up rather than letting it go bad. Shop at the end of your shopping list. If
