Today, there are five current versions of AutoCAD: AutoCAD LT, AutoCAD 2010, AutoCAD LT for Mac, AutoCAD R2019, and AutoCAD LT for Windows. The AutoCAD LT and AutoCAD 2010 apps are the "silver" versions of AutoCAD. AutoCAD LT is the entry-level version that includes two-dimensional (2D) drafting, with no ability to draw 3D objects. AutoCAD 2010 adds three-dimensional (3D) modeling. AutoCAD LT and AutoCAD 2010 are still the only two versions that have remained stable over the last 20 years. They were released in 1994 and 1998, respectively. The new AutoCAD R2019 version released in December 2018, added several enhancements to AutoCAD's 2D and 3D modeling features, and was designed for the next generation of AutoCAD users. AutoCAD LT is sold and licensed as a complete CAD system, with optional software. The standard version of AutoCAD LT includes the 2018 release of AutoCAD's 2D drafting feature, with the option of purchasing additional features, including 3D modeling, later in life. AutoCAD LT for Mac (also called Mac AutoCAD) is a desktop app that runs on the macOS operating system and offers similar functionality to the standard AutoCAD LT for Windows app. The Mac AutoCAD app was first released in May 2015, and is available only as a subscription service. AutoCAD LT for Windows is a desktop app for Windows and is a licensed product that offers the same functionality as the standard AutoCAD LT for Windows app. AutoCAD LT for Windows can be licensed for as little as $199 per seat, with the prices varying based on the features licensed. By Zach Helfand NEW YORK (Reuters) - Federal prosecutors on Tuesday charged a former JPMorgan Chase & Co (JPM.N) employee with leaking the bank's exposure to losses in a complex financial transaction known as Abacus 2007-AC1, as well as multiple breaches of federal securities laws. In a criminal complaint filed in Manhattan federal court, prosecutors said that former senior JPMorgan executive Tom Fuld was "focused" on preserving the firm's reputation and that he and a colleague made repeated disclosures to hedge fund investors about the Abacus deal in violation of their legal obligations to maintain the privacy of such information. Fuld, 57, who had risen to become the firm's global head of credit portfolio management and head of its investment banking and securities services group, was arrested in his New York home on Tuesday evening and has been suspended without pay from his new position with Citi, the Wall Street bank.
