Skype Spam Bot Download Chip.Q: A problem about the computation of a certain series Given a series:

$$\sum_{n=0}^{\infty} \frac{n! x^n}{(n+1)^2}$$

Does there exist any nice closed form for this series? I tried to use the formula (2),

but I failed. A: The limit of your series as $x \rightarrow 0$ is $\sum_{n=0}^{\infty} \frac{1}{n^2} = \frac{\pi^2}{6}$, which can be given as
$$\sum_{n=0}^{\infty} \frac{n!}{(n+1)^2} = \sum_{n=0}^{\infty} \frac{1}{n^2}$$

$$\frac{1}{(n+1)^2} = \sum_{n=0}^{\infty} \frac{1}{n+1} - \sum_{n=0}^{\infty} \frac{1}{n+2}$$

$$\zeta(2) - \zeta(2)$$

$\frac{\pi^6}{6}$. \end{align} \$\$ Q: Linux

kernel function to get a per-user file descriptor (aka descriptor) In the linux kernel source code, there is the function `struct file_operations { int fd; }` which represents a file descriptor. But what I need is a function that is similar to `struct file_operations { per_file_operations ; }` or `struct file_operations { per_file_descriptor_operations ; }` or `struct file_operations {`

`per_descriptor_operations ; } Is`
there such a function in the kernel
source code? A:

The same thing happens for "new" + any letter. I can fix this behavior by disabling the shortcut (I guess I've gotten used to it in 2015.1.2) but I'm just wondering if anyone knows what causes this. A: This is an issue of the UI not being prepared for your shortcut. I'm not sure where it's coming from, but I can duplicate this behavior. A way to work around it is to hold the Ctrl key (i.e. don't type it), and then type your key sequence as normal. This will deselect the shortcut, and you can then press your key sequence normally. Q: Should I consider onreadystatechange or readyState for connection status Do you know if it is better to do this:

```
function connectToServer(){ var request = new XMLHttpRequest(); //Assign the object properties request.open('GET', "", true); request.send(null); //The response is a string that looks like this: //" //SUCCESS" //I'm not sure what to do here request.onreadystatechange = function() { if(request.readyState == 4 54b84cb42d
```
