KeyMacro has been designed as a free, customizable, and cross-platform macro recorder and notepad. The application is designed to let you record and edit any keystroke as well as quickly copy anything that you are typing. KeyMacro allows you to save any combination of keystrokes in a file, and can quickly be accessed through a hotkey. The shortcuts can be easily saved and restored in the event that you want to reuse them later. The most used functions of KeyMacro are: • Quick typing • Repetitive tasks • Clipboard content • Backup and restore Trial:

KeyMacro comes with a 30-day trial. After you install KeyMacro, you will be presented with a screen that will ask you to allow to collect usage statistics from the app. It's a feature that we use to improve the app for future releases. If you allow the application to collect the data, then you will be able to continue using the application. You can always stop collecting data by clicking on the cross in the corner of the application's main interface. You can find more information on the software's official website here: If you are interested in registering for a free trial, please send us an email at or fill out the form below. Once we receive your request, you will be able to download a copy of the trial version of KeyMacro.

Show more Show lessThe present invention relates to a method of manufacturing a semiconductor device, and particularly relates to a method of manufacturing a semiconductor device which includes an SOI (silicon on insulator) substrate. Conventionally, an SOI substrate (semiconductor substrate) obtained by forming a thin semiconductor layer (insulating layer) on

a substrate of a silicon wafer is known. By using such an SOI substrate, it becomes possible to integrate a semiconductor circuit which includes transistors. Since the parasitic capacitance of a MOS transistor formed in an SOI substrate is small, it becomes possible to improve the operating speed of the MOS transistor. The formation of an SOI substrate includes bonding a single crystal silicon substrate to another silicon substrate (supporting substrate) by a hydrogen ion implantation separation method (facility), which is called SIMOX method, and forming a thin silicon layer on the surface of the silicon substrate. In this method, it 1d6a3396d6
