Notes Mail Query Crack+ [Mac/Win]

Notes Mail Query is a handy and reliable application that provides you with a simple means of managing, organizing and monitoring Lotus Notes e-mail messages. With its intuitive interface, Notes Mail Query enables you to search messages by subject or by body fields, re-index NSF files and control which files you want to constantly monitor. As a standalone application, Notes Mail Query can be used independently of any Notes desktop application. Features • Re-index multiple NSF files for the Notes mail database • Create unlimited sets of queries and give a name to each of them • Re-index messages of the current mail database, of sub-databases, of the application database and of the current NSF file • Start, stop and resume query operation from within the application • Define filters for the messages in the current and/or the current mailbox • Create unlimited automatic watch rules and assign a name to each of them • Filter messages using a customized list of words or include dynamic words with the search options • Show messages based on their location on the server • Sort messages by their date of birth, by their date of sending or by their date of reception • Set a range of messages to scan at the same time • Set a time interval for the query to run, based on the number of messages • Create the Watch list (reports) directly from within the application • Filter the reports using a customized list of words • Set the timeout for the results of the report • Exclude, count and display messages • Include, count and display messages based on specific words • Exclude, count and display messages based on their location on the server • Export to Microsoft Excel (CSV) • Import from Excel (CSV) • Export to HTML (code), for creating a report from within the application • Import from HTML (code) • Generate HTML code directly from within the application • Generate code for creating a report from within the application • Help file included System Requirements • Lotus Notes Client V. 5.0 or later • Notes Mail Database • Internet Explorer 7.0 or later • Windows Vista or later • Windows Server 2003 or later • Notes Client V. 5.0 or later • Internet Explorer 7.0 or later • Notes Desktop Client V. 5.0 or later • Lotus Notes Mail Database Notes Mail Query works with the Notes Mail database only. The database is always

What's New in the Notes Mail Query?
