The driver's header file is wia.h, so that might be the import line you're using. Let's just say that if you really wanted to load something, you'd open that file with a text editor, find the line that says: #include "dll.h", and remove the angle brackets from there. Then your game would hopefully load. But, I doubt this will work. As you can see, the thing you're trying to load is only 23,000 characters long. That's
