The Combo Weapon is the most powerful weapon in the game. It shoots a three-round burst of bullets that travel in a cone and explode, creating a radius effect with a 50 yard radius. The Gunsmith will have to go through a process to build this weapon, which will cost the player 1000 Crafting Points. This is the most expensive weapon in the game. It has a high rate of fire (9 rounds per second) and a high damage per shot (23 damage per round). This weapon is also the only one that does damage to enemies other than zombies (it has a 4% chance of dropping Fire Breathing Gas Zombies). To collect the Gunsmith's Tool from the Distillery, it is important to be armed with the Shotgun and Laser Rifle, since these weapons can be used to protect the Gunsmith from Zombies. The Shotgun is the ideal weapon to protect the Gunsmith from Zombie attacks. It has a high rate of fire (3 rounds per second) and a high damage per shot (19 damage per round). This weapon is also the only one that does damage to enemies other than zombies (it has a 2% chance of dropping Fire Breathing Gas Zombies). There are various ways to get the Shotgun. - You can collect it from the Distillery. - You can get it from the 'House Keys' Box if you have any friends who are playing the game. - You can steal it from the Zombie Hunter if you have some extra spare time. The Laser Rifle has a high rate of fire (6 rounds per second) and a high damage per shot (

KEYMACRO is a small and versatile utility that allows you to control your keyboard and mouse from the screen. This way, you can use your mouse to browse the Internet, play games and conduct other activities that require the use of your mouse, while your keyboard is turned off. KEYMACRO has a few basic features that can be grouped into two categories: macro recording and macro playback. Macro recording is where you can record a number of keyboard events or mouse clicks and then replay them whenever you want. Macro playback is where you can press a keyboard shortcut or perform a mouse click in the same way you did it when recording the macro. KEYMACRO offers a number of different keyboard events and mouse clicks that you can record as macros. Additionally, you can set up your hotkeys for the commonly used applications and websites and also for files and folders. If you run a Windows-based PC, KEYMACRO has a built-in recorder that works flawlessly. However, the program also works on Macs, and it can be set up to do the same on Macs as well. Another cool feature is that you can set up hotkeys for your Internet browser and other programs. This way, you can click on a particular website address, bookmark or bookmark folder in your browser, and then hit the hotkey to jump straight to that page. All in all, KEYMACRO is a great tool that can help you save a lot of time, especially when you conduct long tasks on your PC. To add new macros to the program, you simply click on the "Add new" button in the menu, and then you can choose a keyboard event, a mouse click or a hotkey for your browser, a file or folder. KEYMACRO has a few basic features, but it is certainly worth trying out. Features: - You can record keyboard events (such as click on the right mouse button) - You can record mouse clicks (for example, the right click of the mouse or holding down the middle mouse button) - You can record mouse clicks (for example, the right click of the mouse or holding down the middle mouse button) - You can set up keyboard shortcuts (such as Ctrl+N or Ctrl+S) - You can set up a hotkey for your browser (such as Ctrl+T or Ctrl+U) - You can set up hotkeys for all your programs (such as Ctrl+A or Ctrl+X) 1a22cd4221
