PrinterAdmin print job manager PrinterAdmin Print Job Manager 90 Crack. Q: How to extract time from and from a string? I have this string "2015-03-01 11:33:00" and I want to extract only the date from it. I don't need the time. How could I do it? A: DateTime.Parse will take whatever you pass in as a format string and return a DateTime object. If you just want to get the date part of the string, use DateTime.ToString, which will only return the date. A: Why convert it to a DateTime if you just want to get the Date? string dateStr = "2015-03-01 11:33:00"; var date = DateTime.Parse(dateStr); Console.WriteLine(date.ToString("MM/dd/yyyy")); A: Like this: DateTime.ParseExact("2015-03-01 11:33:00", "yyyy-MM-dd hh:mm:ss", CultureInfo.InvariantCulture) But you shouldn't use DateTime.Parse as there is a bug in the parser. If you have some application, you should take the trouble to update to .NET 4.5 or .NET 4.6. See my blog posts and the links from there. Sex differences in the components of metabolic syndrome and its clustering in adolescents, to analyze the relationship between the metabolic syndrome (MetS) and sexual dimorphism in body composition and lipids, the study was conducted with 488 students from schools in the city of São Paulo. Data were collected from physical examination, interview, and anthropometric evaluation. The validity of the metabolic syndrome criteria was checked by a confirmatory approach. The best combination of discriminatory variables for the occurrence of the syndrome was adopted for the final discriminant analysis. There was an association between the occurrence of the metabolic syndrome and excess weight and abdominal obesity in both sexes. In adolescent females, there was a positive association with HDL-c, triglycerides and abdominal obesity. In adolescent males, a positive association was found only with HDL-c. No association was observed between age and the metabolic syndrome in both sexes. The confirmatory analysis confirmed the best combination of discriminatory variables that best differentiated the two
