The phonetic keyboard allows the use of the following Russian letters: А Б В Г Д Е Ё Ж З И Й К Л М Н О П Р С Т У Ф Х Ц Ч Ш Щ Ъ Ы Ь Ъ Ь Ъ Ъ Ю Я The keypresson the Windows key will automatically translate text. Russian Dictionary: Add new Russian words (about 30,000 words, including about 10,000 words from the Internet). The size of the dictionary, which can be reduced, is up to 300 Mb (depending on the number of dictionary words). You will be able to translate words from multiple dictionaries at once. Russian translation: Language translation allows you to send the text to an external program that will be able to translate the text (or use the internal program to translate the word). For example, you can use the Russian translation to translate text in MS Word: 1. Open MS Word and select Russian -> Translate (from the file menu). 2. The word will be translated into English. The program will be suspended, and the translation will appear in the MS Word window. 3. Use the program's "Message" menu to display the translation. Direct-to-text conversion: Using the direct-to-text conversion, you
