Akeni Secure Messaging Server - Expert Edition Activation For Windows

Expert Messenger is a secure Instant Messaging client (SMS/MMS) for mobile phones. It offers standard features such as chat, conference (group chat), notification and file transfer, all with highly configurable, optional, hierarchical groups. Expert Messenger is easy to use and setup, with a basic client and advanced features such as advanced cryptography. It offers a large library of features such as advanced cryptography and server side message logging. Features

1. Client:
 - 100% native code, including the chat application and XML parser
 - Fast, stable, lightweight
 - Use of the client's own chat server, a high performance open source messaging server based on the XMPP standard
 - PC/Mac client
 - Java code
2. Server:
 - High availability and full failover
 - High performance
 - Flexible configuration and high security
 - Offers advanced enterprise messaging features
 - 128-bit encryption, unlimited storage space, and server side message logging
 - Static or dynamic user groups
 - Shared public folders
3. Network Support:
 - Supports MSN Messenger, AOL Instant Messenger (AIM), Yahoo! Messenger, ICQ, Google Talk
 - Supports XMPP
 - Supports AICC, Jingle, IRC, Jabber, Novell GroupWise
 - Supports MSN media (MSN/Hotmail/Live Messenger, Yahoo! Messenger, ICQ)
 - Supports web-based messaging services (e.g. www.gadu-gadu.com)
 - Supports other proprietary clients and public Jabber/XMPP servers
 - User agent validation
 - Ad-aware filtering
 - 16bit, 32bit, or 64 bit Java
4. Desktop
 - notification, multi-instance support
 - Tasks can be created
 - Do Not Disturb mode: Turn off all notifications (in case of something important)
 - Visible system tray icon
 - Set up a custom message or scan for new messages (for large contact lists)
 - Start a chat session from the task list
5. File transfer
 - Send and receive files from different sources (USB, CD, email, FTP, HTTP, etc.)
 - Manage and organize your files with a database
 - Receive unencrypted file transfers over the IM network
6. Error messages
 - Messages are sent to a contact in the error list, and recipients can send a custom error message to the contact
 - Internal errors are logged
