Tiny Editor (TCE) is an lightweight text editor for programmers and text editors alike. It is a successor of TCE 6.5, but with many improvements. This new program is designed to be reliable and fast, yet easy to use and install.

---

One of its features is the ability to save and load the configuration. You can configure TCE to use the High Contrast (HEX Editor) or the Embedded High Contrast (EHC) together with its own independent configuration dialog. TCE also supports a wide range of color schemes. It works on all platforms (MS-DOS, Linux, Mac OS X, Windows, iOS, Android). Tiny Editor 6 is the only Tiny Editor to support all of Windows' clipboard manipulation, which was the reason we were forced to remove all of our previous Tiny Text Editor versions. Programmers who want to write the perfect High Contrast color scheme can find a most comprehensive set of tools in the Developer Pack, which includes a color scheme debugger and editor. Powerful and user-friendly text editor with full source code editor, link assistant and color themes editor. Easily fit in your workflow. It can easily edit both simple source code and C++, HTML, XML, Javascript, C, and C++ code. Media Element (ME) is a single-page web application that allows you to play video and audio and record as a streaming media player. Many HTML5 features are used: Web-standard H.264/AAC/MP3/webm and Ogg/Opus/HE-AAC+/webm formats, device detection, subtitle and text track metadata support, visualizations of the audio and video track, playlists, playlist library, sortable media library, etc. ME can extract the audio track of any.flv file (with the option to choose which audio sample rate), and can decode.MP3 and.OGG files. It offers the possibility of converting any media file to another format. ME's color schemes can be edited on a single page in a simple way and are intended to become the preferred color schemes for your projects. Apple Color is a source code editor based on the Eclipse development tool for Linux. It makes the work of programmers pleasant by enabling them to write,
