The free but very useful Avast! Messenger is an instant messaging software with functions including voice and video calls, video and group chat, webcam recording and chatting, message transfer, news feed, link and file sharing. The program is available for Windows and Mac platforms. The program supports all IM protocols, including: AIM, Yahoo Messenger, MSN Messenger, ICQ, Gadu-Gadu, Trillian, Android Chat, Google Talk, Google Talk IM, and others. An important advantage of Avast! Messenger is the absence of ads and annoying notifications. The program is completely free and ad-supported. The default settings allow you to receive notifications, while the settings can be changed to turn off the notifications. The Avast! Messenger is compatible with the following platforms: Windows: Windows XP, Vista, 7, 8 and 10 Mac: OS X 10.0 and higher Linux: versions of Red Hat Enterprise, CentOS, Debian, Ubuntu, Fedora and others iOS, Android The program can be completely free and does not require any registration. With Avast! Messenger, you will never miss a message. It is very easy to add contacts to a chat room. Enter the user's information in the right-hand pane, then hit the "Add Chat" button. By default, the room settings are changed so that all visitors see the messages you post. File sharing capabilities are quite useful if you have a backup, or if you have a ton of files on your computer that you want to share to others. In the "File Sharing" tab, you can view the shared files. The program allows you to chat via webcam or video calls. You can have a video chat with someone in addition to a text-based chat. When the video call is activated, you can turn the audio off/on. The program has a large collection of emoticons, which are displayed next to the chat text. The emoticons can be downloaded and applied to your conversation with your friends. Avast! Messenger stores messages, so that if you reinstall the software, the messages are not deleted. The storage of chat messages is described in the help section of the software. You can delete the chat history (if the chat room is not visible) or remove specific types of messages. Finally, Avast! Messenger can handle video and audio files. You can record your own video clips, import or download the files from YouTube or any other video sharing site, and

Ads Killer for Paltalk Messenger Description: Ads Killer for Paltalk Messenger V1.0.0/12.08.2018 Ads Killer for Paltalk Messenger is a small, yet reliable program dedicated to removing the adverts in the Paltalk chat windows. The instant messaging software allows ads to be displayed in chat rooms, in PM chat windows or in the Search window. The small application can block all ads in Paltalk while it is running. Detect the Paltalk version Ads Killer for Paltalk Messenger is a useful tool since it can remove adverts from a large series of Paltalk editions. The instant messaging software changes the class names for ads in each new version released, which makes most ad blockers ineffective. In other words, the ad blocking algorithms built for previous versions of Paltalk do not work with newer editions. Ads Killer for Paltalk Messenger can detect the Paltalk version, as long as the chat software is installed on your computer. Once it identifies the version, it notifies you if it is capable of blocking the ads. Alternatively, you may manually enter the Paltalk Build number in the dedicated space. Remove ads and buttons Ads Killer for Paltalk Messenger is capable of blocking adverts in chat rooms, as well as in private message windows and in group/room search. All you need to do is insert the Paltalk build number in the dedicated box or let the software automatically detect it. Once this step is finished, you may activate the ad blocking function, then use Paltalk without being distracted by flashy commercials. The software requires administrative privileges and it can block any ad within Paltalk as long as it is running. Start or stop the ad blocking at any time Ads Killer for Paltalk Messenger allows you to pause/resume the process at any time, however, it automatically stops when you exit the program. You need to keep the program opened while using Paltalk. The software causes the ads to no longer be displayed, therefore the dedicated area remains blank. Key Features: Tightly controls the build of Paltalk, including Paltalk versions up to 12.07.2011 Detects and removes ads on Paltalk versions up to 12.08.2018 Block ads on Paltalk if the build is higher than the actual version Automatically detects the build number of Paltalk running on the system 6a5afdab4c
