Alarm-Clock Download

Alarm-Clock Download With Full Crack is a light-weight portable application that has a clean and simple interface, with only a digital and analog clock and a window where you can view your reminder and notification settings, among others. Define and schedule the time to open the applications You can configure the alarm clock to launch any program on the system you wish, create new shortcut links to existing programs, or add your applications to the registry so you can start them directly. You can launch up to 32 apps simultaneously. Installation Although the program offers to add a shortcut in the Windows' Start menu for easier access, it doesn't come with any setup or installation file. It can also save your settings to a file, allowing you to uninstall it from the system without losing the settings, so you can easily start up the program from anywhere, with no additional setup or install files needed. Configure the alarm clock To configure the program, you can display its properties and the System and Performance tab, then select the Scheduling option. Under the General tab, you can choose the time you want the alarm to go off, set up a reminder or schedule the wakeup time. You can configure when the screen saver should run, check to enable multiple instances, schedule a program to run or minimize windows to the tray, start Internet Explorer, Mozilla Firefox, Microsoft Wordpad or Notepad or maximize all open windows. Use the built-in file browser to locate and assign an audio file as the alarm sound The application comes loaded with predefined audio tracks. Choose a track from the drop-down list and hit the OK button to assign it to the program. The sound will play when you launch the selected program or turn on the computer. Alarm-Clock Crack For Windows screen and interface The application has a user-friendly interface and a small layout. Its primary window is divided into an analog and digital clock. When you launch it, you can use the system tray to schedule the wakeup time for the alarm clock. Set up a reminder You can choose a specific time to set up a reminder and alarm, and the program will show a notification on the taskbar every time you select the scheduled time. Customize program preferences In addition, you can make it open at a certain time, shut down the computer, show a personalized message, enter sleep mode, minimize all windows, as well as to launch Internet Explorer, Mozilla Firefox, Microsoft Wordpad or Notepad, among others.

KeyMacro is a lightweight utility that lets you create and schedule macros to simplify your repetitive and task-intensive computer activities, while being portable and allowing you to work from any PC. Work from anywhere It's a freeware utility for Windows users, a portable tool that's able to work from any system that has a mouse and a keyboard, making it a great choice for home or office use. Furthermore, you can save the macros on a USB flash drive or burn them to CD/DVD for easy and convenient usage. Create and configure macros You can configure keyboard, mouse and modifier keys to create macros and use the application's internal editor to design each. You can also set the key to use when pressing a macro, choose if the mouse needs to be used as well, or even assign macros to a single key, so that you can use it to run the same commands without having to change the computer's setting, and be able to automate even the most routine of actions. Set up macros for common tasks You can create macros to start programs, open web pages, run applications, open documents or open a special folder. It can be used to set up auto-start programs, tasks, or even pause the computer to send automatic messages and messages to others, giving you the freedom to work as you want. Evaluation and conclusion KeyMacro doesn't ask for any personal information and it's portable, which makes it a great choice for work or home use. Its main features are listed below: Work with mouse and keyboard You can run it from any system that has a mouse and keyboard to work from anywhere. Create macros without any

restrictions The software doesn't limit you to having any particular key or modifier key, instead you can choose what you want to use and what key you want to press. This makes it the ideal utility to automate any repetitive task you do daily. Save macros to USB flash drive It allows you to save your macros and sets up a portable system for easy usage. Automatically stop the computer You can enable a timer to pause the computer when you're away from it, or you can stop it at the same time every day, or even to play the system's own alarm sound. Evaluation and conclusion Unfortunately, KeyMacro has not been updated in over two years, since March 12, 2014. Besides that, it doesn't include any useful features for computer users. Alarm-Clock is a lightweight application you can use to schedule alarms, reminders, and notifications. It allows you to change the date, time, and day of the week, as well as set up an alarm clock. Is that a joke? No way. Alarm-Clock is a feather-light and portable application you can use to schedule an alarm clock to set up reminders and notifications. It includes several practical options that can be easily configured, even by those less experienced in such software. Set up an alarm clock and audio alert The interface is user-friendly, made from a small window with a simple design and layout, where you can view an analog and digital clock, as well as use the built-in file browser to locate and assign an audio track as the alarm sound. It's possible to shut down, restart or log off the PC, show a personalized message, load the screensaver, minimize all windows, as well as to launch Internet Explorer, Mozilla Firefox, Microsoft Excel, Wordpad or Notepad, among others. Customize program preferences Furthermore, you can change the date and time, make the frame stay on top of other windows or minimize it to the systray to become non-intrusive, allow multiple instances, schedule programs to launch, and integrate the tool into the Windows autostart sequence, so that it runs by default every time you turn on your computer. Portable application It's not wrapped in a setup kit, so you can save the downloaded files anywhere on the disk or copy them to a USB flash drive, in order to run it on any PC with little effort. It doesn't need any DLLs or other components to run, create files on the disk without asking for permission, or add new entries to the system registry. However, it auto-updates a file to remember you settings on exit. Evaluation and conclusion We haven't come across any problems in our evaluation, since the tool didn't freeze, crash or show error messages. It left a small footprint on system performance, since it needed a low amount of CPU and RAM to work properly. Too bad that it hasn't been updated for a long time. Other than that, Alarm-Clock comes loaded with some handy options to help you set up an alarm clock and schedule audio files to play, programs to launch, and the computer to power off. Alarm-Clock is a feather-light and portable application you can use to schedule an alarm clock to set up reminders and notifications.
