Documentation niceLabel Pro is a professional software program for printing multi-purpose labels containing barcodes, text and graphics. Please be aware that the trial version of niceLabel Pro is fully functional for 30 days.

After this date, a license code is required to continue working with niceLabel Pro. Features of niceLabel Pro: Create professional looking labels with rich text, barcodes, and graphics. Print labels from different databases for labels and memory cards. Generate serial codes with many choices for bar codes. Compatibility niceLabel Pro is a

---

32-bit application; you can use it with all Windows operating systems.

Compatibility with printers: When printing a label, you need to select the printer type. Many different printers are supported. In the menu, you can select the desired printer. The program is compatible with most printers used in Windows. Serial codes In niceLabel Pro, a number of serial codes are available to generate. Users can select any serial number or barcode type and customize it as needed. New and existing serial codes: Many serial codes for use with Microsoft® Access or any other database. Most popular serial codes for use with Access are included.

---

Serial codes are included with the installer. What is Serial Number? Serial numbers are assigned to products so that they can be tracked and managed efficiently. Every single product has a unique serial number called a "serial number" and it is assigned by the manufacturer. In general, customers use a serial number to retrieve detailed information such as a product description, warranty information, warranty renewal, warranty period, technical support contact, and other product-related information (e.g. accessories, printer manufacturer, etc.) You will not find a serial number assigned by the manufacturer to your

---

serial number with the product. It is very important to protect your serial number from being seen by others.

What are the benefits of a serial code?

You will have access to the most important information related to your serial number such as warranty information. If your product is lost or stolen, you can get your serial number back from third-party services such as GiftNumbers.com. The data in your serial number is protected from being altered or replaced by someone else.

More specifically, • You will be able to access information about your serial number for any kind of products. • The serial number protects your data such as

---

product descriptions, warranty information, warranty renewal, warranty period,

#### What's New in the NiceLabel Pro?

Label designer: create professional-looking labels, text, images, pictures, shapes and logos Full-featured graphic editor: edit and create text, graphics, rectangles, lines and ellipses Built-in print assistant: print labels, barcodes and text Viewer to edit externally saved projects Errata-free software with updates NiceLabel Pro is a reliable, feature-rich tool designed for creating multi-purpose labels. It provides the

---

designer and user with fast label editing, job logs, printing options and user support. NiceLabel Pro is a feature-packed software program that integrates user-friendly yet advanced tools for printing multi-purpose labels containing barcodes, text and graphics. Professional tools and designing environment The interface of the application is professional-looking and intuitive. You can start a new project by selecting a preferred printer (the tool supports double-sided printing), label stock, page size, label layout and dimensions, as well as by importing variables from a file. NiceLabel Pro supplies users with some standard

---

graphic editing tools which revolve around standard and curved text, basic and rich text boxes, bar codes (e.g. keyboard input, counter, date and time fields), pictures, rectangles, lines and ellipses, among others. Quick label customization It is possible to manipulate data via functions, by processing values from existing variables. The app also provides access to external databases, and this procedure can be easily executed through a wizard. An advanced feature of NiceLabel Pro lets you create and edit existing algorithms, thus taking charge of the data implementation method. After-design options Projects

---

can be exported to the Pocket PC-supported format, a printer, SAP or EPS files, or to graphics. The utility's configurable options focus on error settings, logging, folder locations (e.g. for labels, pictures, memory cards), UI language, user rights and permissions, appearance and printers. The application allows you to print batches of labels, with incremental series codes and automatically customized barcodes. You may select from a multitude of print templates, place each label on an individual paper or create your own model. Label local storage NiceLabel Pro allows you to create a database of labels, barcodes and other elements. In

---

order to access the database, however, a designated manager program is required, through text, OLE DB or native drivers. Reliable designer, editor and print assistant NiceLabel Pro clearly offers users a multitude of

---

**System Requirements:**
