IUWEshare Free Portable Data Recovery is a reliable tool that allows you to recover lost files from drives, both local and removable media. The program is capable of retrieving a large variety of files from multiple file systems, including FAT 16, FAT 32 bit or NTFS. Moreover, you can easily select the files you wish to save. Restore files from various systems IUWEshare Free Portable Data Recovery allows you to restore files that were accidentally lost or are currently inaccessible, due to a multitude of reasons. Whether your hard drive crashed and caused data loss, a piece of hardware presents with an error or your system was subjected to virus attack, some files may yet be recovered. The program can restore several types of files, from documents, to pictures, emails, audio tracks, videos, compressed files. Other types of documents, such as.ini,.xml,.html, fonts, projects or programming language scripts can also be recovered. Double type of scanning IUWEshare Free Portable Data Recovery can initially perform a quick partition search, in order to detect lost sectors, after which it starts the intelligent search. This process represents an in-depth scan of the selected drives, attempting to detect partition tables, FAT/NTFS boot records, folders and folder parts. All the recovered files are displayed in the table, when the process is finished or interrupted. They are also sorted by their extensions into several folders, in order for you to easily find them. Most files are displayed along with their file size, type and dates of deletion, creation or last access. Advanced preview function While not available for all the recovered files, the preview function in IUWEshare Free Portable Data Recovery allows you to open the selected item in a separate window. Alternative text, HEX and image modes are available for previewing. The program allows you to select each file individually, before moving on to the next step, saving the retrieved items.

**IUWEshare Free Portable Data Recovery Description:** You might have noticed that no matter whether you are listening to music or taking a video, your system often freezes or lags during playback. Whether your hard drive is packed with files, or your processor works too hard, it is possible that your computer will not be able to efficiently handle these tasks. Due to these reasons, you might want to have a free software that can help with the issue. EndNote 8 Desktop is a reliable file search program that enables you to get to your documents, spreadsheets and presentation files
