FIFA 22 introduces “HyperMotion Technology.” Using motion capture data collected from real-life players playing a complete, high-intensity football match in motion capture suits, FIFA 22 gameplay utilizes those data to provide the most accurate, responsive, fluid, and immersive control you have ever experienced. FEA (Friction) is a great way to explain just how realistic and authentic the ball movements look and feel when played with true-to-life control. In our research, the combined application of motion capture data and the implementation of our new FEA technology truly stands as the breakthrough in player control responsiveness that we have been striving for, giving players the power to feel as though they are controlling the ball with incredible touch, precision and accuracy.

“Watching real-life footballers by Viscount Stevens, and the incredibly talented Alan J Flanagan Motion Analysis technologist, I know we have produced the best on-the-pitch experience that we can, but I was stunned to see how much more accurate FIFA was in terms of how the ball movement felt,” said Producer Mohamed Abu Khalil.

Season modes include Career, International, Club, and the all-new Birthplace. Create your dream club to ascend through the divisions, style your kits, and nurture world-class players in your brand new stadium. Alternatively, test your skills as a Pro, embarking on a Player Career that offers more ways to progress, achieve and immerse yourself in your path towards Champions League glory.

What's new:

- Almost a year since last year's edition, we only launched FIFA in South Africa at the start of the month, when the 2014 Premier League season kicked off. Already we've seen some amazing stories of local players breaking into the national team and fending off rich offers to turn their backs on mom and dad to spend time in Manchester or London.
- Our philosophy this year is that we're listening to the fans. We've worked hard to streamline the gameplay experience, better cater to your needs, and also listen to the cries from the UK and the U.S market that want more features for teams and leagues.
- A great single player experience drives FIFA to that deeper level.
- We've changed the roster rules. We're opening the game up to players from across the world, and hopefully set a good example for the game.
- We've opened the game up more this year, but as always we work hard at contextualising and making beautiful life-like environments so that you feel immersed in the world.

FIFA is a series of association football video games, published by Electronic Arts. The series has been commercially successful, with FIFA selling over 100 million copies since the first edition in 1992. The series has been popular around the world, especially in Europe and South America. In 2007, FIFA was the third-best-selling games franchise of all time, after Call of Duty and Grand Theft Auto. In the United States, EA's share price increased by 52.1% following the announcement of FIFA 13. History [edit] The first game of the series, FIFA International Soccer, was originally released by Konami in arcades in 1989. This was followed by a Sega Megadrive port in 1990, and the PlayStation port in 1991. FIFA Soccer 96 (named after the year in which the game was released in the United States) was the first official title in the series for the Nintendo 64. While the game would be the last game in the original FIFA Soccer series, the game would be the first to feature licensed teams from the United States. A short time later, Konami would release a completely new series of titles for the Nintendo 64 under the name FIFA Sports, a name which would last until FIFA 10. However, the new version of FIFA dropped the Nintendo 64's multiplayer modes for the original's supporting the Nintendo GameCube. The first four FIFA games were all published by EA Canada (later EA Canada Worldwide). EA Canadian's first FIFA game, FIFA '95, would be the first FIFA game to feature licensed teams from outside the United Kingdom. While the game would be the last entry in the original FIFA Soccer series, EA Canada would continue to publish games in the series under the name of FIFA Soccer, although only one game of this type, FIFA 99, would have EA Canada' label on the box. The next title in the series would be EA Sports' debut FIFA title, FIFA 96, which would introduce a time management element to the game, in place of the on-field gameplay featured in previous FIFA games. The game would also be the first FIFA game to feature licensed teams outside the United Kingdom, with the game featuring teams from the Netherlands and France. The game, however, would not be well received by critics, selling as few as 200,000 copies. Following its release, EA Canada would be merged with Electronic Arts' European division, EA UK. FIFA Soccer 97 was the first EA Canada-published FIFA game to feature licensed teams
