Napping brothers, who lost dad in Bahamas, fly across country to see dad's funeral EUROPEAN CITY -- Sixto and Julio Caceres are six years old, but still wear their trademark bow ties, sit side by side at the dinner table and sometimes even have matching smiles. The two big brothers talk in fluent English and Spanish with their parents, and often, their siblings. They show a high interest in the news and sports. But Julio doesn't talk about what happened to their father. The boys live in Oahu, Hawaii with their mom, three sisters and grandmother. Their dad, Cesar Caceres, drowned two years ago in the Bahamas, where he was vacationing with his wife and kids. The family has had a hand in opening the doors for more immigrants to the U.S., and there are fears Caceres' death may be a warning sign for others like him who travel with families, not single adults. Sixto and Julio do not remember much of their father. They were 6 and 3 years old, respectively, at the time of his death. Their mother has been pushing them to share about it, slowly. "Every time we see each other, they are going to ask, 'Did Dad tell you what he went through in the Bahamas?' And I have to tell them, 'He's not here right now,' " recalls Celia Caceres, who was pregnant with Sixto at the time of her husband's death. "It's been tough, but I'm pretty comfortable saying it was for the best." Cilia Caceres, a nurse, and a cousin of the sisters went to the Bahamas with their son and the uncle, Jairo Caceres. The group had just left his wife and two children in Hawaii, where Jairo Caceres' wife, Marcela, was living with the Caceres girls in the same house. The uncle brought the boys to the Bahamas with him and they lived with him at a lodge. But the uncle's wife and daughter stayed home to handle the girls while the men vacationed. No one told the kids what happened to their father until they returned home to Hawaii on Feb. 18, the Caceres' 54th wedding anniversary. "It was like a ghost came in our bedroom, and he said, 'Your dad is sleeping over in the bed next to mine.'

The default brush in Photoshop, the Pencil, can be used to draw or paint on a canvas. You can also use the Pencil tool to draw abstract shapes, play with different color combinations, and create works of art. There are also a variety of different shapes and options available. The Hand tool allows you to draw, erase, or manipulate shapes on a canvas. You can use the Hand tool to make eraser-like strokes, add shapes or draw letters. Once you get the hang of it, you can use the Hand tool to create anything you want. The Paths tool allows you to create paths for outlines, such as a border around an image, a box, a box with a border, or a circle. You can also use the Paths tool to create compound paths, like lines, which is great for creating custom shapes and text. The Feather tool allows you to selectively erase or remove parts of an image. Select a section of an image with the Feather tool, then drag a box around it to select the area that you want to erase. This is useful for creating art pieces, erasing unwanted objects, or removing noise from an image. The Blur tool allows you to soften an image or increase the amount of blur in an image. You can blur an image to create a subtle effect, soften the overall look of an image, or increase the effect of a photo. The Fade tool allows you to introduce a gradual change from one image to another, which creates a transparent effect. You can use the fade tool to add a subtle gradient to an image, or you can apply a preset gradient. The Smudge tool allows you to erase or bloat images. This tool gives you a lot of freedom to change an image with no visible edges or seams. You can use the smudge tool to create smudges, like eye smudges and smears, and use it to cut out unwanted objects, too. The Healing Brush is a tool that allows you to remove the blemishes in an image. The Healing Brush takes an idea for removing objects from your mind and converts it into a visual process. It's really great for removing little pieces of the image that shouldn't be there. This is the tool that allows you to capture a set of pixels in an image and replace the pixels with ones from a nearby area. The Pen tool is a great way to draw, edit, and redraw on a canvas. You can use the Pen tool to
