Last month, Dairy Management Inc., the trade association representing the U.S. dairy industry, released a report showing that the amount of money consumers spent on dairy products has grown steadily since 1993, and yet the per capita consumption has actually fallen. "There has been no change in the amount of milk consumed," said Eric Mast, the organization's spokesman. "The consumer is the one who has chosen." Dairy Management may be preaching to the choir. But its numbers reveal what appears to be a growing consumer awareness of the issue. According to the report, Americans spent \$22.84 on dairy products in 1993. By 2009, that number had increased to \$25.29. It is still a lot of money, especially since milk accounts for only about 15 percent of the average American diet. Still, consumers' taste for milk may be shifting, with increasing numbers of shoppers favoring healthier alternatives. Whole milk prices have declined steadily for years. Sales of skim and low-fat milk have increased. According to Nielsen data analyzed by Cornell University researchers, Americans consumed 21.1 billion gallons of milk in 2010, and sales of light and low-fat milk were up 14.4 percent from last

What's New in the Thumbnailer Lite?

Short name: Thumbnailer Available versions: Main 1.0.5 File type: Installer License: Free for home user Language: Auto Home page: Latest News: 08.12.2005 Update 1.0.5, 08.09.2005 Update 1.0.4. Product Description: Thumbnails are great but annoying. The interface of Windows Explorer and its context menus are very different and of course Windows Explorer lacks a simple macro-based tool for quick thumbnail generation. Thumbnailer Lite provides you with all functions and tools to enable you to quickly create thumbnails and set them to your video files. It supports the Microsoft Windows operating systems from Windows 98 up to Windows 7. The application can be used as a stand-alone application and as a plug-in for Explorer. Furthermore, we have written a batch file, which enables you to create all the thumbnails of your video files with one click. The thumbnails of all video files are created in a folder and you can find it under C:\Windows\Temp. You can change the folder, where all thumbnails will be stored in later. Thumbnails · Create thumbnail without any transformation This transformation can be defined by you and you can choose the dimensions of the new thumbnail. · Make a thumb of your video file The current video file will be the source file and the selected frame will be the thumbnail. So, it's up to you to define your transformation or make a thumbnail for a video file. You can choose which part of the video file will be displayed in the thumbnail. · Set a thumbnail as auto rotation In this case, the rotation will be defined by the image (rotated about the center or the middle of the thumbnail image). · Use a watermark You can put a watermark on your thumbnails. So, your user will know that these thumbnails are all yours. Framers There are different ways to define the frame used for the thumbnail. The frame is not automatically defined by the created thumbnail. You can do this manually or apply predefined settings. Storing thumbnails · Create a folder in your own path When you have created all your thumbnails in Thumbnailer, you can store it in a folder of your own choice. The thumbnails will be stored
