Windows 10, 8.1, 8, 7, Vista and XP based Microsoft's Text to Speech (TTS) Use Windows Speech Recognition or third party Windows - Aims to detect and read text from a range of document types - Saves documents to PDF format as a means of converting speech to text. Nowadays individuals are looking for ready to use programs that take away the guesswork when it comes to performing any type of visual communication. It's a key feature of getting things done and doing things quickly, but requires a range of skills in order to gain the necessary knowledge when it comes to how to set up and use the program. Related to text to speech, this is also a language translation software. You may be familiar with the former, but never heard of the latter? Well, it's an interesting option, and one that's not going to be available to all as it's more of a premium-focused feature. What is, however, is a program that makes it easy for everyone to talk and use the computer. Speech recognition is key What is Speech Recognition you ask? It's a simple question and one that may seem a little to obvious, but it's essential for individuals to recognise text in a conversational environment. When you use the computer via its menus or even in an email, you're dealing with the visual interface. But when you're talking to a friend or even by phone, you're using speech. And what's more is that the technology we now have in place makes it easy to recognise it. This is, however, a feature that will only be found in Windows 7 and later versions, but for users of any operating system, it's a feature that can make working faster and easier. It can also work with a variety of languages, audio formats and even the length of the document you provide. Speech recognition is the input method of choice, and what's more is that it's a feature that Windows has had for a long time now. As such, it's a standard offering, but one that's very useful and can add a lot of comfort to the work you perform. It works when other software won't Naturally, there are times when this feature does not work. When it does, it's something that you need to work
