I want to get a text from an HTML page using a selenium webdriver (Java) but my problem is that my text is in a script tag and can't be access after page load. This is the text I want to get: var text = "Text from HTML page to get"; Is there a way to do that? A: The script is loaded after the page is rendered. Selenium webdriver can't read script tags as they are rendered later, but we can dynamically generate a script and insert it into the DOM after the page is loaded: var script = document.createElement('script'); script.innerHTML = "var text = 'foo';"; document.body.appendChild(script); b7e8fdf5c8
