I want to customize view in my listview. For example, I want to add "Text" on my listview. A: The more basic way of doing this is by adding a View to the listview, or setting the ListViewItems to a specific type. The second option can be done as follows: ListViewItem lvi = new ListViewItem(new Label()); lvi.Content = "example text"; listView.Items.Add(lvi); The major difference of this way versus the other is that if the views in the actual ListView are changed the changes are shown in the UI. Q: Plugin setup: Command line doesn't add an icon to the menu I'm trying to add a plugin to the eclipse menu by using this tutorial: Only I'm using PDE.
